

The Plant Breeding Innovation Management Program (PBI MP) is a global, voluntary, industry driven approach focusing on quality management, best management practices, transparency, and flexibility. The result is a program tailored to each participant's unique circumstances.

Benefits of Joining PBI MP

- Protects technology by assisting developers in bringing products to market.
- Third-party verification and transparency add robustness and credibility to developer programs, creating greater trust and societal acceptance of PBIs.
- A management program is important to facilitate trade in an environment where global regulatory requirements are varied.
- Supports compliance and quality standards expected by customers and regulators enabling added value via external assessment and continuous process improvements.

Who Should Join?

Participation in PBI MP is encouraged for those public or private entities involved with plant PBI, including genome editing, to achieve a robust approach to quality and product management. The program aspires to enhance acceptance and sustainability of PBI products.

Dues & Membership Types

Type	FTEs	Dues
